## Press conference: protection of copyright in the age of artificial intelligence

**Rapporteur Axel Voss will brief journalists on Tuesday 10 March at 15.00 on Parliament's proposals to protect EU creative production in the age of artificial intelligence.**

Earlier in the day, plenary is set to outline principles to protect copyrighted content from free use in generative artificial intelligence (AI) training. MEPs want to ensure that AI providers clearly acknowledge the protected content they use to train AI tools and grant right-holders fair remuneration. The draft report to be put to a vote at noon suggests that right-holders should be able to prevent the use of their protected content for AI training and insists that the training of AI with content generated in the EU should be subject to EU laws. The protection of the press sector and the dangers of generative AI for media pluralism are also addressed in the report.

[Legal Affairs Committee \(JURI\)](#) rapporteur [Axel Voss \(EPP, DE\)](#) will brief journalists following the plenary vote and will answer questions about the next steps.

**WHEN:** Tuesday 10 March, 15.00-15.30 CET

**WHERE:** European Parliament, Strasbourg, Daphne Caruana Galizia press conference room (Weiss N -1/201) and via [Interactio](#), with interpretation into and from English, French, German, Spanish, Italian and Polish.

**HOW:** Accredited journalists can attend the press conference in person. Those wishing to participate actively and ask questions remotely can do so via [Interactio](#). The press conference will be streamed live and made available on demand on Parliament's [Multimedia Centre website](#).

### Using Interactio to ask questions

Interactio is only supported on iPad (with the Safari browser) and Mac/Windows (with the Google Chrome browser). When connecting, enter your name and the media organisation you are representing in the first name / last name fields.

For better sound quality, use headphones and a microphone. Interpretation is only possible for interventions with video. Journalists who have never used Interactio before are asked to connect 30 minutes before the start of the press conference to perform a connection test. IT assistance can be provided if necessary.

When connected, open the chat window (upper right corner) to be able to see the service messages.

For more details, check the [connection guidelines and recommendations for remote speakers](#).
